

ANZYZ TECHNOLOGIES PRESENTATION

Svein Olaf Olsen, CEO

Prof. Ole-Christoffer Granmo, CIO

An AI revolution

The Beginning

The problem in a data-driven world

To get access the insights that are needed most

Volume of data/information created, captured, copied, and consumed worldwide from 2010 to 2024 in zettabytes

Challenge for the company

Companies Drowning in Data

Difficult making data accessible

Impossible to dig down in data

The New York Times

August 16, 2019

“Artificial Intelligence is being taught by thousands of Office workers around the world – it is not exactly futuristic work”

Rebecca Conway for The New York Times

Anzyz Technology methodology

3 great inventions integrates supervised, unsupervised and manual rule based learning

Self-learning

No manual tagging

Never been published

System called **Corpus Cube Linguistics™ - CCL™**

Anyz CCL™
works on big
and small
datasets

Focused verticals

Health

USD 5.9 billion in 2020 USD 61.6 billion by 2027

Public, Defence, Security

Security market USD 5.08 billion in 2020

Legal and Compliance

Legaltech USD 3,2 billion 2018 growth USD 37,8 billion 2026

Anzyz CCL Unique Winning Points

- CCL™ is the same regardless of language, alphabet or dialect
 - Low costs of operation
 - Multiple value addition in terms of lowered human and technical resources
 - Saving time on operations and resources
- We are able to predict the future – not published

Anyz technology

- Anyz is self-learning
- No manual tagging
- Works on multiple platforms

The most powerful and advanced analysis system

- All languages
- Dialects
- All alphabets
- Jargon, typos, slang and new words
- Double meaning, misspellings and emoticons

One hour to learn to use

No special expertise is
needed

Journalinformasjon

Pasient ID
23

Informasjon om valgt pasient
ID: 23 Hashid: UMWgjAM0xO3jJfg2jKIAAA==
Kjønn: Kvinne Alder: 76

Operasjonsdato: 02.01.2014 08:00:00
Operasjonstype: Osteosyntese m/glidenagle (DHS/HCS), fraktur, prox femur

Ø.hjelp: Ja

Journalinformasjon

ikke nakkekrage på. Man setter det på på rtg.før man tok et rtg.cervical columna.
På akuttmottaket klager hun over smerter i nakken og hodet. Ingen kvalme eller oppkast.
Jeg ser til pas. og gjennomfører neurologisk us. uten funn.
GCS 15. Sidelike pupiller.

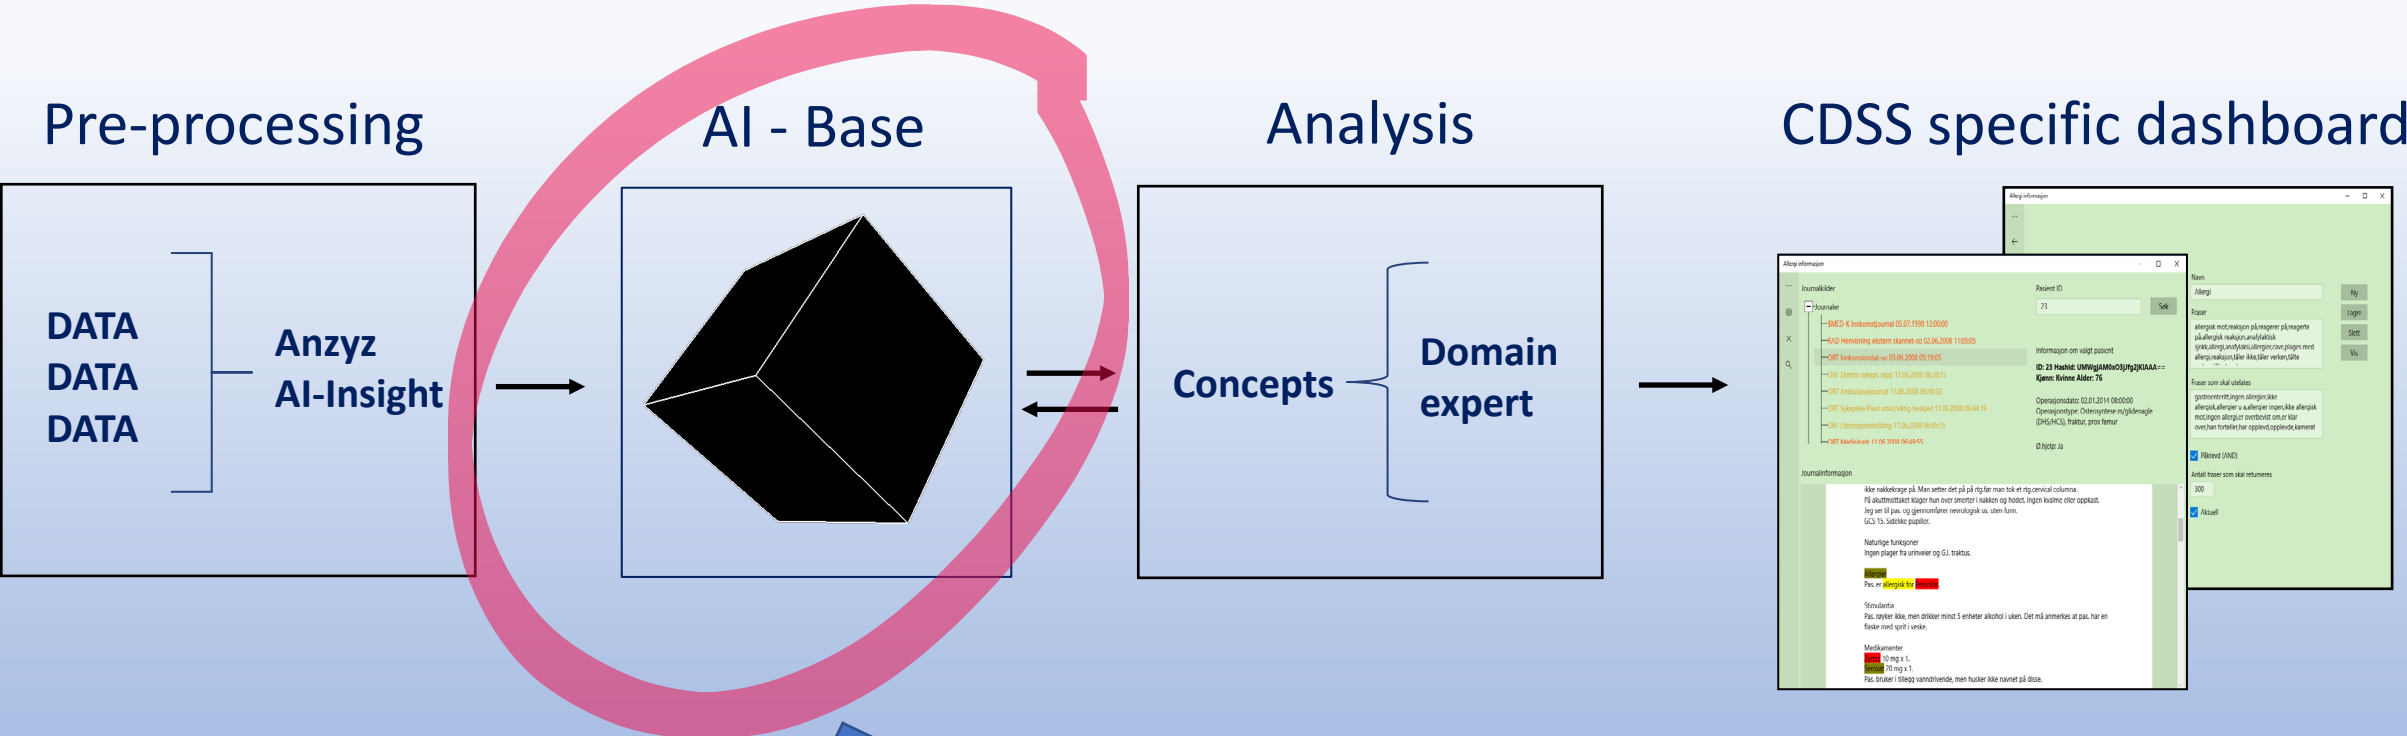

Naturlige funksjoner
Ingen plager fra urinveier og G.I. traktus.

Allergier
Pas. er allergisk for **Penicillin**.

Stimulantia
Pas. røyker ikke, men drikker minst 5 enheter alkohol i uken. Det må anmerkes at pas. har en flaske med sprit i veske.

Medikamenter
Zyrtec 10 mg x 1.
Seroxat 20 mg x 1.
Pas. bruker i tillegg vanndrivende, men husker ikke navnet på disse.

Anzyz AI-Insight Process Hospital case

Our self-learning algorithm tagged millions of words, and syntacs in three days

Anzyz AI-Zelf™

Estimert kostpris NOK 5-7 mill.

Zelf - service

Zelf-learning

Zelf-analyse

Zelf-made

Global market size for artificial intelligence in healthcare in 2016, 2017 and a forecast for 2025

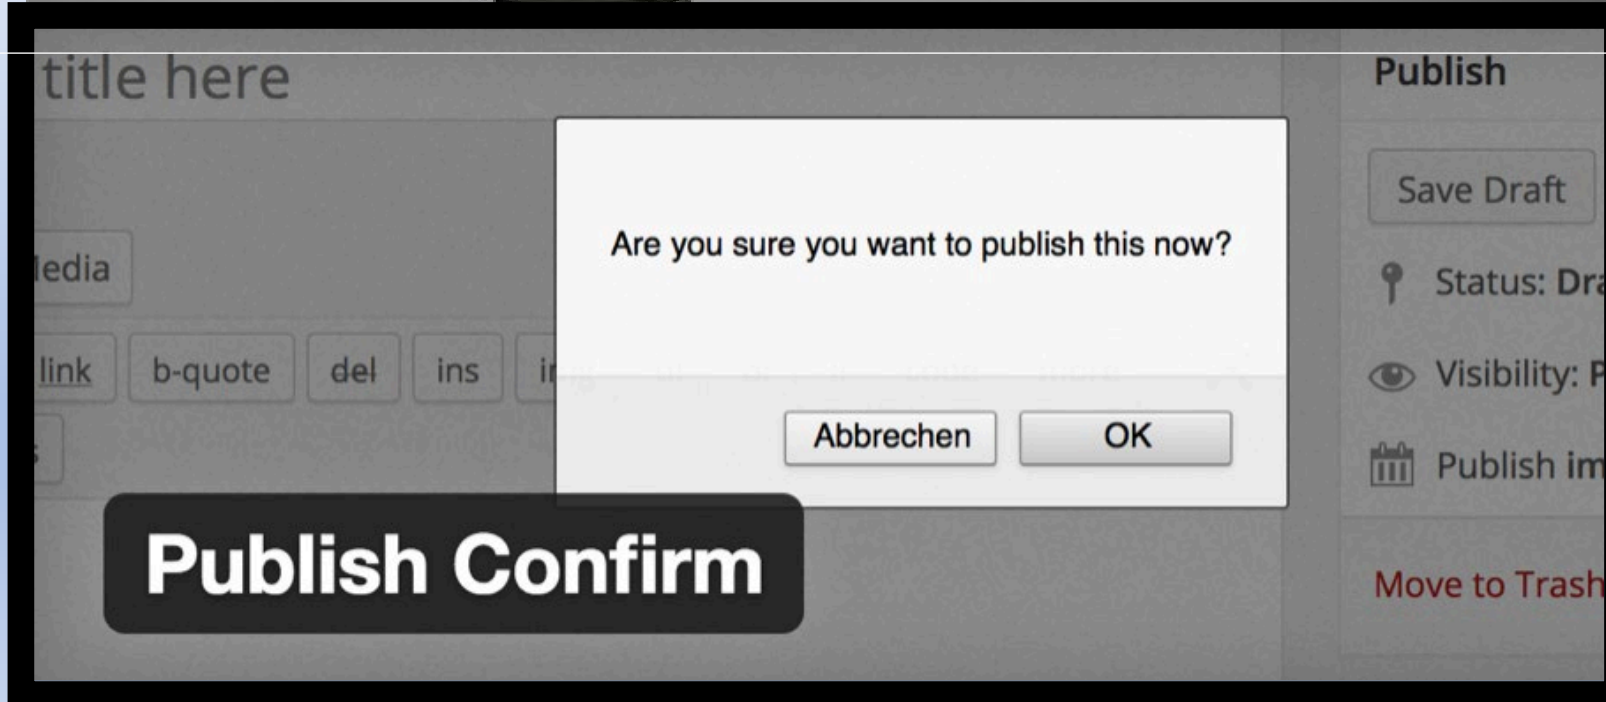

Machine
+ Human
= Superhuman Intelligence

Three great inventions integrates supervised, unsupervised and manual rule-based learning

Never been published

Founders

Professor Ole-Christoffer Granmo is Director of the Centre for Artificial Intelligence Research (CAIR) at the University of Agder (UiA), Norway. His passion for artificial intelligence was lit at the age of ten when he got his first computer and discovered programming. Fascinated by the idea of superintelligence, he obtained his master's degree in informatics in 1999 and the PhD degree in 2004, both from the University of Oslo, Norway.

Granmo develops theory and algorithms for systems that explore, experiment and learn in complex real-world environments. Drawing inspiration from the paradigms of deep reinforcement learning and probabilistic causal reasoning, he seeks to surpass human capability in flexible pattern recognition, model building and reasoning. Within his field of research, Granmo has written more than 115 refereed journal- and conference publications.

Apart from his academic endeavors, he is also co-founder of Anzyz Technologies AS. His industrial experience includes social media, energy markets, insurance, emergency management, oil and gas, telecom, and the public sector. Within these areas, Dr. Granmo has provided a wide range of data analysis and forecasting solutions, involving data- and text mining. His area of expertise further covers monitoring and control, as well as optimization and resource allocation, extended to visualization, simulation and decision support. Together with Svein Olaf Olsen, Granmo founded Anzyz Technologies AS in 2014.

Svein Olaf Olsen has a MA in Special Needs Pedagogy and Communication from Statens Spesiellærerhøgskole, now University of Oslo. Olsen has worked as CEO in various different industries, such as transport, tourism, property development, industrial sectors, telecom and IT. Furthermore, he has founded several companies in Scandinavia, Africa and Central Asia. In addition, Olsen has experience from working as a journalist at both Nye Sørlandet and Aftenposten. He has served on numerous company boards. Together with Ole-Christoffer Granmo, Olsen founded Anzyz Technologies AS in 2014.

The Team

Ex major Kristiansand-gründer-sivil økonom

Sold Chipcon for NOK 1,3 mrd I 2006.

Microsoft and Anzyz

Microsoft

Milestones:

ISV Partner – January 2019

OCP Partner – November 2020

Microsoft OCP program:

One Commercial Partner (OCP) organisation offers an operating model that enhances the potential value that we can offer the market together. Under the new model we will take on even more of an orchestrating and advisory role, making it easier for our customers to gain value from the solutions offered by Microsoft partners.

Health (Western European e-health Team)

Legal (Europe)

Public, Defense Security (Redmond)

Microsoft use Anzyz as their tool for text analytics and are incorporated in Cognitive Search
